

Philippe SIRVENTE-MAROTO

Web Developer · React / TypeScript · UI/UX & Architecture

sirvente.philippe@gmail.com · 06 79 71 48 33 · Paris · [LinkedIn](#) · [GitHub](#)

Web developer with 5 years of experience shipping products end-to-end. Proficient in TypeScript, with expertise in defining frontend architectures, selecting modern stacks suited to project constraints, and designing, developing, and maintaining scalable and robust features with seamless integration between front-end and back-end systems. Strong user-centric design sensibility, from art direction to component implementation. Comfortable tackling complex technical challenges and writing clean, maintainable, well-documented code. Daily use of AI tools to stay up-to-date with the latest technologies and trends and to boost productivity. Brings a low-ego, team-spirit mindset and strong problem-solving abilities to audit, structure, and stabilize an existing frontend: full-stack feature development, quality standards, architecture overhauls, design system creation, and tooling for reliable, maintainable codebases.

SKILLS & TECHNOLOGIES

Methodology : Agile / Scrum

Frontend : React, NextJS, TypeScript, JavaScript, TanStack Query, Redux, TanStack Router, Vite, CSS Modules, Tailwind, Electron, Motion (Framer Motion / Motion for React)

Backend : Java, Django, Python, Node.js

UI/UX & Design System : React Aria, Storybook, Figma, Photoshop

Testing : Vitest, Cypress, React Testing Library, Jest, Playwright, Cursor browser testing

AI Tools : Cursor, Claude

Infrastructure : Docker, CI/CD GitLab, Husky

Languages : Anglais C1 · Espagnol C1

PROFESSIONAL EXPERIENCE

2022 – Present | **Frontend Engineer** | [Egis](#) | Paris

- Defined the modern frontend stack and architecture from scratch
- Moved from a front-end role to full stack development, designing, developing, and maintaining scalable and robust features with seamless integration between front-end and back-end systems (building and managing endpoints and serializers)
- Developed complete design systems with a strong user-centric design approach
- Designed and built, end-to-end, features such as a chat, a leaderboard, custom logo-based loading screens, a gamification system with custom animated notifications and badge-linked challenges, tables, a filtering and sorting system, drawers, a page transition system, form navigation system, forms, and a tab system — tackling complex technical challenges to deliver elegant, efficient solutions
- Upheld high standards of code quality: React Testing Library, Cypress, Vitest, Jest, Playwright, Cursor browser testing, Storybook, Husky, code reviews, commit and branching conventions, and clean, maintainable, well-documented code
- Applied AI tools (Cursor, Claude) to stay up-to-date with the latest technologies and trends, refine and optimize code, and accelerate skill development
- Built a web application to host an internal AI product (IRIS), deployed to 18,000 employees with 5,000 daily active users (FCI Awards 2025 - "Grandes entreprises" - [Étincelle d'Or](#))
- Designed a project centralization tool for construction industry professionals (Memory)
- Mentored an apprentice for one year; hired on a permanent contract at the end of the apprenticeship
- Collaborated closely with cross-functional teams, including product managers and designers, to deliver high-quality software solutions

2021 – 2022 | **Frontend Engineer** | [SustainEcho](#) | Paris

- Shipped components and systems end-to-end, such as a dashboard, a stepper, and a table built from scratch with filtering, search bar, and sorting, prioritizing a user-centric design. Built the interface using the Ant Design library already present in the project, plus custom components
- Took ownership of the overall UX development, creating a design system in Figma. Redesigned the platform's visual identity
- Designed a platform to improve the environmental performance of building construction

2019 | **Développeur Web** | [Assemblée Nationale](#) | Paris - Stage 2^e année

- Developed an internal web tool for locating members of parliament by floor and office (SAPUI5 interface)

FORMATION

2017 – 2022 | **Expert in Information Technology Diploma** | [Epitech](#) | Paris

4th year at Université du Québec à Chicoutimi (UQAC) — Coursework in Java (multithreading, aspect-oriented programming), Object-Oriented Programming, Artificial Intelligence, and English.
